Hello, everyone! Today, we want to introduce our platform and invite you to discover it with us.

Let's embark on this exciting journey together.

Home

Welcome to the heart of our learning platform, the homepage, where we've put our creativity to work to create a dynamic and inviting experience for you.

Quiz

Front and center, we offer four quizzes designed specifically for parents. These quizzes are tailored to help you gain a deeper understanding of mental illnesses empowering you with knowledge and insights to better support your child.

Services

Scroll down a bit, and you'll find a selection of our services :

- First, we have our 'Essay Correction' feature, a tool that assists students in refining their writing skills.
- Then, there's our 'Emotion Recognition' tool that helps kids improve their emotional intelligence.
- For those who love stories, our 'Storyfy' section is a treasure trove.
- And finally, when you're ready to connect with us, don't hesitate to visit our 'Contact Us' section.

As we continue our journey through this amazing learning platform, let's now shift our focus to one of its core elements

Authentication

- the login and registration process. So, without further ado, let's discover our login page and take that first step towards unlocking the world of learning and support.

Chatbot

The chatbot is here to assist you every step of the way, providing answers to your questions and offering support.

Learning Space

- Our dashboard is your personal path to progress. Track language, intellect, and social skills with ease. Set goals, explore historic activities, and thrive.
- Emotion recognition is a vital skill, especially for those with disabilities. With our platform, students can choose a phrase and, with a click of the 'magic button,' an image is generated to express the emotion associated with the phrase. This feature helps kids practice and improve their emotion recognition abilities.
- Next, we have our essay correction feature. Students can upload their handwritten paragraphs, choose an image, and specify the number of lines in their paragraph.

If the OCR didn't catch words correctly, students can manually make corrections. When they click 'correct,' they receive a table that contains both the cons and pros of their paragraph, helping them improve their writing skills.

- In the 'Storyfy' section, students can simplify complex paragraphs or input a keyword to generate an engaging story. The stories are accompanied by emojis, a friendly narrator, and images to make the learning experience both fun and informative.
